

Enduro AR Coatings

Experience Optimal Clarity & Protection

With Enduro AR Coating

Enduro AR from RLab

Anti-reflective (AR) coatings enhance vision by reducing glare, reflections, and halos, improving clarity, especially at night or in other low light conditions. They minimize eye strain from screens and bright lights while offering UV protection and scratch resistance—keeping lenses durable and easy to clean.

RLab is proud to offer our Enduro collection to deliver the best coatings on the market and add years to your investment, improving how you and others see you.

	Coating	Clarity	Durability	Cleanability	Backside UV	Blue Filter	Warranty

Enduro Azuro

with Energy Absorbing Technology

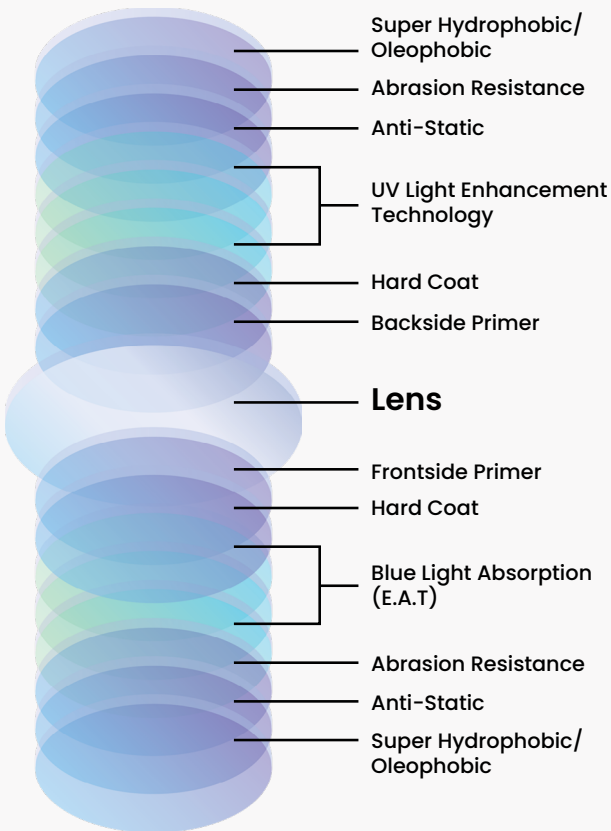

Blue light protection *without the reflection*

Protect your eyes & enhance your style with Azuro, our top-of-the-line blue light absorptive coating.

With screens more prevalent in our lives than ever, Azuro makes work easier by reducing digital eyestrain, and improving sleep when the day is done.

With less glare than untreated lenses, the Azuro coating doesn't add a tint or harsh blue reflection to the lens, enhancing your appearance.

Feel confident that you can enjoy vision with clarity and style when you choose Azuro.

Enduro Granite

Lenses Designed to Withstand Life's Demands

Enduro Granite is a high-performance anti-reflective lens coating designed for exceptional durability and clarity. Engineered to withstand daily wear and tear, it offers industry-leading scratch and smudge resistance, making it ideal for those with active lifestyles.

The coating effectively reduces glare for improved visual comfort, repels dust and water to maintain cleaner lenses for longer, and ensures easy maintenance.

With its combination of toughness and transparency, Enduro Granite provides long-lasting protection while enhancing vision quality.

Scratch Resistant
& Easy to Clean

At RLab, we craft precision lenses—and support the people who bring them to life. **Because exceptional work deserves to be seen.**
