Explore Our Adaptive Lenses

Promic Photochromics

One Pair. All Light Conditions.

Introducing lenses that think for you. Powered by advanced photochromic technology, our smart lenses react to UV light in real time—darkening outdoors for protection and clearing up indoors. It's seamless, stylish innovation for your eyes.

Promic lenses boost contrast, cut glare, and block 100% of UV rays. They also filter blue light in any setting—available in a range of tints to suit your style.

Experience the future of vision with Promic. Built to protect, enhance, and adapt—so you can see better and be seen at your best.

Lenses That Adapt to Your Life

Promic lenses adapt to changing light conditions, so you don't have to.

Low Light

While indoors and during evenings, lenses become clear

Medium Light

Cloudy days offer a medium tint with UV protection

Bright Light

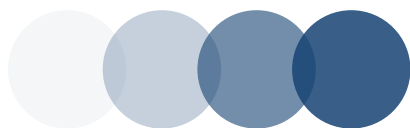

Sunny days create dark lenses with UV protection

Exceptional work deserves to be seen

As an optical lab with vision, we know that there are no one-size-fits-all options when it comes to lenses. Featured here are just some of the extensive offerings available at RLab.
